JULY 5, 2017

GUIDELINES ON CYBER SECURITY ONBOARD SHIPS

Members may already have seen this document, but your Managers thought it would be helpful to draw attention to it as an independent initiative.

This is the second edition of these Guidelines. They are the result of the work of a joint industry group comprising BIMCO, the Cruise Lines International Association (CLIA), the International Chamber of Shipping (ICS), INTERCARGO, the International Association of Independent Tanker Owners (INTERTANKO), the International Union of Marine Insurance (IUMI) and the Oil Companies International Marine Forum (OCIMF).

The Guidelines have also been aligned with the recommendations contained in the International Maritime Organization's (IMO) guidelines on cyber risk management adopted in June, 2017.

The issue of cyber security as it affects shipping has become a matter of growing concern for the maritime community in recent years. It is hoped this document will be useful to Members in providing further background and assistance on the subject.
